

Stark Industries Model SI-RV-316-6K-1/4" Relief Valve

Features:

This Number is the pressure setting

- Pressure rating – Up to 6000 PSI
- Flow rate – up to 100+ CFM
- Adjustable range – 750 to 6000 PSI (6 spring sizes)
- Springs are color coded for identification (see list below)
- Material – Grade 316 Stainless Steel
- O ring – Viton (Seat = 2 -106 - VT-75)
- Fully trapped O ring – Provides extended service life
- Operating characteristics – Gradual relief for safe operation
- Six exhaust ports – Reduces air velocity, safer discharge
- Wrench size = $\frac{3}{4}$ ", Inlet – $\frac{1}{4}$ " MPT

Note: The pressure will increase above the set pressure as the valve begins leaking with higher flow rate compressors. This must be taken into consideration when applying the valve to big compressors.

Spring Pressure Ranges – 750-1500 = Purple, 1500-2250 = Orange, 2250-3000 = Brown, 3000-4000 = White, 4000-5000 = Red, 5000-6000 = Dark Green,
