Stark DD-55 Kubota Diesel Compressor Specifications

- Air flow – 55 CFM @ 5000 PSI, (air cooled, 5 stage compressor)
- Engine – Kubota V3600T
- Fuel capacity – 25 gallons (provides 8 hour run time)
- Battery included, Direct drive (No belts)
- Offshore chassis, Offshore drip pan, 4 point lift, fork lift slots
- Special corrosion prevention treatment for offshore environment
- Gauge panel, inter-stage & oil pressure gauges
- Automatic high pressure un-loader control
- Auto condensate drain system, Low oil pressure shutdown
- Drain Separator/Silencer for Auto Drain/Unloader system
- Compressors are autonomous (Self Contained – No External Resources Required)
- Dimensions – 55" x 100" x 76" High, Weight – 4,700 pounds

Weather Proof
Control Panel

This is an extremely heavy duty package
Very smooth running compressor
